DESCRIPTORS: *Clouds, *Noctilucent clouds,
Atmospheric condensation, Dust, Theory,

The dust hypothesis, explaining the noctilucent cloud
occurrence by the accumulation of meteor dust parti-
cles or of volcanic matter, is being met with serious
objections. The condensation hypothesis, on the con-
trary, explains not only the altitude limitation of
noctilucent clouds, and the constancy of their altitude,
but also their connection with meteorological phenom-
(Earth Sciences- Meteorology, TT, v. 11, no. 4) (1-6)
